ConTeras Industrial Group Acquires CD Energy Services, Expanding Specialty Services Platform in the Rocky Mountain Region

Acquisition expands ConTeras' Western U.S. footprint and adds Denver-based scaffolding, insulation and access capabilities

Houston, TX – July 15, 2026 - ConTeras Industrial Group ("ConTeras"), a national industrial and commercial multi-craft service contractor, today announced the acquisition of CD Energy Services ("CD"), a Denver-based specialty contractor serving customers across the Rocky Mountain region and the Western United States.

The acquisition expands ConTeras' presence west of the Mississippi and strengthens its ability to support industrial and commercial customers in the Rocky Mountain region. CD operates through two established businesses, CD Specialty Contractors and CS Colorado Scaffolding, expanding ConTeras' regional capacity and complementary service capabilities.

"CD Energy Services is a strong strategic fit for ConTeras because it brings together commercial and industrial scaffolding, insulation, and access capabilities in a key Western U.S. market," said Adam Mohr, CEO of ConTeras Industrial Group. "CD has built established customer relationships through the work of its local teams, and we intend to support the service standards that helped build those relationships. As we continue expanding in the Rocky Mountain region, our focus is to maintain safe, reliable service and continuity for CD's customers and employees while giving its teams the backing of the broader ConTeras organization."

Based in Colorado, CD has established a strong reputation as a specialty services provider with a balanced mix of commercial and industrial work. The company has built strong relationships in the power generation market, supported by recurring maintenance work and retrofit projects. CD also brings complementary field execution capabilities that align closely with ConTeras' platform.

The acquisition advances ConTeras' growth strategy following its partnership with funds managed by Oaktree Capital Management, L.P. ("Oaktree"). ConTeras is building a national platform for maintenance and capital project services through operating companies that provide insulation, scaffolding, coatings, shoring, access systems, turnaround support, and related solutions.

As part of ConTeras, CD Energy Services will continue serving customers with the standard of service they expect. The business will also be able to draw on the broader platform for additional capacity, expertise, and complementary services while ConTeras works with CD's local teams to maintain continuity for customers, employees, and vendor partners.

About ConTeras Industrial Group

ConTeras is a leading national commercial and industrial multi-craft service contractor delivering scaffolding solutions, industrial insulation, industrial painting, heat tracing, abatement, remediation, and general maintenance through our group of superior specialty service providers, including Incorp Industries, ECRS, and Performance Insulation Contractors.
